INTELLI-CORE Structural Composite Construction

The Most Waterproof
The Most Durable
The Best Insulation
No Slip or Rot Floor
INTELLI-CORE Panels

INTELLI-CORE STRUCTURAL COMPOSITE TECHNOLOGY
Numerous advantages over traditional construction methods result in a lighter, stronger, easier to use, and longer lasting product which increases capability and productivity.

Lightweight – The lightest trailers in their class. Easy to tow, even behind utility vehicles.
Durable - Structural composite construction results in a dent resistant, stronger, and more resilient design.
Non-Conductive – Panels are constructed out of fiberglass, foam, and/or honeycomb materials.
Store Indoors or Out – Panels are waterproof, UV resistant, and built to handle the elements.
Easy to Maintain/Clean – Pressure wash inside and out. Smooth surfaces are easy to clean.
No Organic Materials = NO Mold, NO Rot, NO Mildew!
Precision Engineering – All panels, cabinetry, and storage solutions manufactured using CNC equipment for higher quality and industry leading fit and finish.
Thermal Advantage – Paneled construction gives a higher insulated product that is easy to heat/cool at a lower cost.
Easy to Graphic – Smooth, seamless paneled construction provides improved aesthetics and easy graphic application. Panels are available in many color options.
RF Transparent – Composite panels allow for radio wave transparency.
Longer Life – A CORE trailer utilizes manufacturing methods and materials that last longer reducing the frequency and need for replacement.
Easy to Repair – Damage is quickly and easily repaired at a lower cost.
